

Unwinder/Rewinder

1650 / 3200

FOR JUMBO ROLLS FROM 300 KG TO 1000 KG

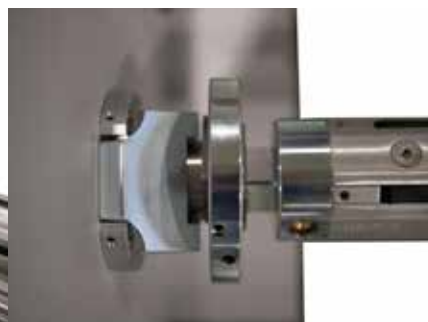

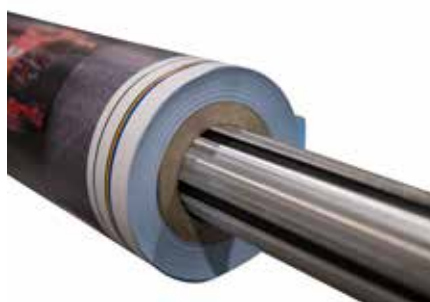

Unwinder/Rewinder

The Unwinder/Rewinder is a complete autonomous system that manages Jumbo paper rolls with max width of 1,65 - 3,2 m and length up to 1000m. Designed both for current and future machines. It can be used on the front or back of cutting, printing or combined systems; max flexibility in the configuration where with a unique product you can have a rewinder or an unwinder, according to the dynamic needs of production. Moreover, a system taking the tensioner position through optical sensors, controls the clockwise or counter clockwise rewinding of the roll. The working speed is being managed by a PLC.

MAIN FEATURES

- Automatic speed management
- Brushless motor technology
- Rotation direction selectable from an operator panel
- Roll holder shaft
- End roll electronic control device
- Weight from 300 Kg to 1000 Kg

Datasheet	1650	3200
Length	235 cm	390 cm
Width	65 cm	65 cm
Height	85 cm	85 cm
